SUMMARY

Final-year Computer Science undergraduate specializing in **Agentic AI**, **LLM systems**, and Backend Engineering. Experienced building and deploying production-grade AI systems using **FastAPI**, **Redis**, **Celery**, and **MongoDB**, with hands-on experience in **multi-agent workflows**, asynchronous processing, AI automation, and reliable system design.

EDUCATION

Indian Institute of Information Technology, Bhopal

Sept 2023 – Jun 2027

B.Tech. in Computer Science & Engineering

CGPA: 8.44

Relevant Coursework: **Data Structures & Algorithms**, **Object-Oriented Programming**, **DBMS**

EXPERIENCE

Founder & AI Engineer | **ZapplyX**

May 2026 – Present

- Architected and deployed a production AI workflow platform serving 30+ users, automating startup discovery, enrichment, LLM personalization, resume tailoring, and outreach across 12,000+ founder profiles.
- Built a scalable multi-agent workflow system using FastAPI, Redis, Celery, MongoDB, and Playwright, coordinating 6 autonomous agents through asynchronous queues, retry policies, and concurrency control.
- Engineered production AI infrastructure with multi-provider enrichment, SMTP verification, Prometheus monitoring, structured logging, and trace IDs, strengthening workflow reliability and observability.

Research Project | **Hardware Optimization for DSP & Image Processing Systems**

Jan 2026 – Present

- Optimized fault-tolerant hardware scheduling using Particle Swarm Optimization (PSO) and DMR/TMR techniques, reducing execution latency by 25% and improving area efficiency by 18% across DSP benchmarks.

Team Leader | **Agentic AI Project, EY Techathon (Round 2 Qualifier)**

Dec 2025 – Jan 2026

- Ranked among the top 4,000 teams out of approximately 2 lakh registered participants, leading a 5-member team to build Stratabid™, an agentic RFP orchestration system with 4 parallel agent workflows.
- Developed a hybrid retrieval and evaluation pipeline combining FAISS vector search with weighted rule-based scoring across 100+ specification parameters, reducing bid turnaround time by up to 80%.

PROJECTS

Courtroom Trading System | Python, FastAPI, MongoDB

[GitHub](#) [Live Site](#)

- Designed an **LLM-powered multi-agent decision system** using a Bull–Bear–Judge architecture, producing **structured, explainable outputs** with deterministic validation.
- Engineered a **hybrid validation pipeline** combining LLM outputs with **four market signals** to filter weak trade setups and reduce inconsistent model responses.
- Developed a **persistent reasoning layer** in MongoDB storing **4+ fields per trade** (bullish/bearish factors, reasoning, setup), reducing repeat inference to **0 additional LLM calls** and enabling **O(1)** retrieval for history replay.

GlidePAY | Flask, MongoDB, React.js, REST APIs

[GitHub](#) [Live Site](#)

- Built a custom **UPI-style** payment app with **Flask** and **MongoDB**, enabling QR-based **peer-to-peer** transfers and multi-mode payments for **20+ active users**.
- Implemented **MongoDB transactions** and **session-based authentication** to support consistent and secure payment flows.
- Deployed the **React.js** front end and **Flask** back end via Render with REST API integration; reduced API latency by **35%** through routing improvements.

ACHIEVEMENTS

- Excelled in competitive programming: secured CodeChef **4-star (1824)**, Codeforces **Specialist (1506)**, and LeetCode **Knight (1902)** while conquering **1000+** algorithmic challenges spanning data structures, algorithms, and algorithmic optimization.
- Amazon ML Summer School 2026**: Selected among **3,000 students** from over **1.34 lakh** applicants (**Top 2.5%**) for Amazon's flagship machine learning program.
- Cohere Labs ML Summer School 2026**: Received a certificate of participation for **meaningful participation and contribution** to the ML Summer School.
- Dominated global competitive programming contests: secured top ranks on CodeChef (**180th**, **336th**, **406th of 28,000+**), Codeforces (**608th of 40,000+**), and LeetCode (**321st of 30,000+**), showcasing exceptional algorithmic skill under high-pressure scenarios.
- Demonstrated leadership as **Executive, CODAME IIIT Bhopal**, organizing coding contests and technical workshops for **550+ students** and increasing participation by **50%** through outreach across **10+ institutes**.
- Semi-Finalist, Tata Imagination Challenge**: Ranked among the **Top 5,000** participants out of **10 lakh+** nationwide applicants in a national-level strategy and innovation competition.

ADDITIONAL INFORMATION

- AI & LLM**: OpenAI SDK, FAISS, Agentic AI, Multi-Agent Systems, LLM Applications, Retrieval
- Backend & Systems**: FastAPI, Flask, Celery, Redis, MongoDB, PostgreSQL, Distributed Systems, Asynchronous Workflows
- Languages & Tools**: Python, C++, JavaScript, SQL, Git, GitHub, Docker, Linux, Prometheus, Postman
