SUMMARY

Final-year Computer Science undergraduate specializing in **AI Engineering**, **LLM systems**, and Backend Engineering. Experienced building **production-grade AI systems** with **FastAPI**, **Redis**, **Celery**, and **MongoDB**, with hands-on experience in **agentic workflows**, RAG, realtime AI, asynchronous processing, and system integration.

EDUCATION

Indian Institute of Information Technology, Bhopal

Sept 2023 – Jun 2027

B.Tech. in Computer Science & Engineering

CGPA: 8.44

Relevant Coursework: **Data Structures & Algorithms**, **Object-Oriented Programming**, **DBMS**

EXPERIENCE

AI Engineering Intern | ZapplyX

May 2026 – Present

- Architected and deployed a production AI workflow platform serving 30+ users, automating startup discovery, enrichment, LLM personalization, resume tailoring, and outreach across 12,000+ founder profiles.
- Built a scalable multi-agent system using FastAPI, Redis, Celery, MongoDB, and Playwright, coordinating 6 autonomous agents via asynchronous queues, retries, and concurrency control for reliable parallel execution.
- Engineered production AI infrastructure with multi-provider enrichment, SMTP verification, Prometheus monitoring, structured logging, and trace IDs, strengthening workflow reliability and observability.

Research Project | Hardware Resource Optimization & Digital Watermarking

Jan 2026 – Present

- Formulated a metaheuristic hardware optimization framework for DSP data-flow graphs, integrating scheduling, register allocation, graph coloring, and area-latency analysis across 34 DSP benchmarks.
- Implemented and benchmarked 7 metaheuristic algorithms: PSO, GWO, ACO, BFO, Firefly, GA, and KH, using a unified pipeline for hardware resource optimization.
- Extended the framework with 12 security algorithms for digital signature embedding, balancing hardware cost and watermark security with post-embedding register conflict resolution.

Team Leader | Agentic AI Project, EY Techathon (Round 2 Qualifier)

Dec 2025 – Jan 2026

- Ranked among the top 4,000 teams out of approximately 2 lakh registered participants, leading a 5-member team to build Stratabid™, an agentic RFP orchestration system with 4 parallel agent workflows.
- Developed a hybrid retrieval and evaluation pipeline combining FAISS vector search with weighted rule-based scoring across 100+ specification parameters, reducing bid turnaround time by up to 80%.

PROJECTS

Courtroom Trading System | Python, FastAPI, MongoDB

[GitHub](#) [Live Site](#)

- Designed an **LLM-powered multi-agent decision system** using a Bull–Bear–Judge architecture, producing **structured, explainable outputs** with deterministic validation.
- Engineered a **hybrid validation pipeline** combining LLM outputs with **four market signals** to filter weak trade setups and reduce inconsistent model responses.
- Developed a **persistent reasoning layer** in MongoDB storing **4+ fields per trade** (bullish/bearish factors, reasoning, setup), reducing repeat inference to **0 additional LLM calls** and enabling **O(1)** retrieval for history replay.

VoiceHire | FastAPI, React, TypeScript, MongoDB

[GitHub](#) [Live Site](#)

- Integrated a **realtime Voice AI interviewer** with **LiveKit**, Deepgram STT, ElevenLabs TTS, and LLMs, orchestrating streaming, VAD, noise suppression, turn-taking, and **sub-150ms barge-in** for low-latency interaction.
- Orchestrated a **6-stage adaptive interview FSM** with **resume/JD-grounded RAG**, depth probing, topic rotation, claim tracking, and cross-turn memory for **adaptive questioning** in **English/Hindi**.
- Implemented a **5-dimensional evaluation engine** with weighted scoring, evidence extraction, contradiction detection, calibrated verdicts, **Prometheus telemetry**, and **77/77 tests**.

ACHIEVEMENTS

- Excelled in competitive programming: secured CodeChef **4-star (1824)**, Codeforces **Specialist (1506)**, and LeetCode **Knight (1902)**, while conquering **1000+** algorithmic challenges and ranking **180th**, **336th**, **406th** on CodeChef, **608th** on Codeforces, and **321st** on LeetCode among **28,000+**, **40,000+**, and **30,000+** participants.
- Amazon ML Summer School 2026**: Selected among **3,000 students** from over **1.34 lakh** applicants (**Top 2.5%**) for Amazon's flagship machine learning program.
- Demonstrated leadership as **Executive, CODAME IIIT Bhopal**, organizing coding contests and technical workshops for **550+ students** and increasing participation by **50%** through outreach across **10+ institutes**.
- Semi-Finalist, Tata Imagination Challenge**: Ranked among the **Top 5,000** participants out of **10 lakh+** nationwide applicants in a national-level strategy and innovation competition.

ADDITIONAL INFORMATION

- AI & LLM**: LLMs, Prompt Engineering, AI Evaluation, Embeddings, Tool Calling
- Backend & Systems**: REST APIs, WebSockets, Distributed Systems, Async Processing, Authentication, PostgreSQL, Docker, Linux
- Languages & Tools**: Python, C++, JavaScript, TypeScript, SQL, Git, Pytest, Postman
